```java
import java.util.Scanner;

class opt
{
    public static void main(String args[]){

        int rem,result,sum=0;

        Scanner x=new Scanner(System.in);
        System.out.print("Enter a number : ");
        int num = x.nextInt();

        while(num!=0)
        {
            rem=num%10;

            sum=(sum*10)+rem;

            num=num/10;

        }
        System.out.print(sum);

    }
}
```
